

MEHRAN KHAN

MERN STACK DEVELOPER

Peshawar | mkmehran123khan@gmail.com | +92-3404060041 | [LinkedIn](#) | [Portfolio](#)

SUMMARY

Experienced Laravel Developer with strong hands-on experience building reliable and scalable web applications. Skilled in Laravel, PHP, MySQL, HTML, CSS, Bootstrap, JavaScript, and jQuery, with a growing interest in modern JavaScript stacks such as MERN. Proven ability to design clean system architectures and deliver dynamic, data-driven features using Laravel and Blade templating. Developed multiple real-world projects including management systems and full-stack applications. Capable of handling complete development workflows from database design to user interface implementation. Focused on writing efficient, maintainable code and delivering high-quality solutions.

TECHNICAL SKILLS

FRONTEND DEVELOPMENT

- React.js
- Next.js
- JavaScript
- React Query / TanStack Query
- Tailwind CSS
- React Query
- React Testing
- React Query / TanStack Query
- Jest – Unit testing

BACKEND DEVELOPMENT

- Node.js
- Express.js
- MVC Architecture
- RESTful APIs
- Authentication & Authorization
- MVC Architecture
- Cron Jobs & Background Tasks
- Webhooks Integrations

DATABASE , TOOLS & PLATFORM

- MongoDB
- MySQL
- MSSQL
- Postgres SQL
- GitHub Actions
- Git & Github
- Cursor
- Anthropic Claude code
- Prompt Engineering

PROFESSIONAL EXPERIENCE

LARAVEL Developer (Onsite)

IT HUB | Peshawar Pakistan

FEB 2025 - AUG 2025

- Developed and maintained backend systems using Laravel, focusing on building RESTful APIs for web applications.
- Designed and tested API endpoints using Postman, ensuring proper request handling, validation, and response structure.
- Implemented core backend functionalities including CRUD operations, authentication, and role-based access control.
- Worked with MySQL database for schema design, relationships, and optimized queries for better performance.
- Used Git and GitHub for version control, collaboration, and code management throughout the development lifecycle.
- Deployed and managed projects using modern tools and platforms, with basic experience in frontend integration and hosting services like Vercel.

ECTurbo - Shipping Management Platform

Web Application | Link: <https://ecturbo.com>

- Developed a comprehensive shipping management platform for a Saudi Arabian logistics company with multi-dashboard architecture, featuring warehouse management system enabling vendors to manage accounts, warehouses, payments, and shipment operations with real-time tracking.
- Implemented role-based access control, integrated payment processing, comprehensive reporting dashboards for operational insights, and admin panel with full oversight of shipments, client management, and payment tracking.

Event Management & Catering System | Web ApplicationWeb Application

- Developed a full-stack Event Management & Catering System to streamline booking, planning, and service management for events. Designed role-based modules for customers, vendors, staff, and administrators to ensure smooth workflow and access control.
- Implemented core functionalities including event booking, hall management, catering services, staff assignment, and package management for different event requirements.
- Built dynamic dashboards with real-time data handling for bookings, payments, and service tracking using Laravel, Blade, and MySQL.
- Developed CRUD operations, search/filter systems, and reporting features to improve management efficiency and user experience.
- Focused on scalable backend architecture, clean database design, and responsive frontend interfaces for smooth user interaction across all modules.

MERN Stack Developer (Remote)

Property Management / Real Estate System | Web Application

JAN 2026 - FEB 2026

- Developed a full-stack Real Estate Management System to simplify property listing, buying, renting, and management processes for users and administrators. Designed role-based access for agents, property owners, and customers to ensure secure and organized operations.
- Implemented property listing features including add, edit, delete, and search with advanced filtering based on location, price, and property type.
- Built booking and inquiry management modules allowing users to request property visits and communicate with agents efficiently.
- Developed admin dashboard for managing users, properties, inquiries, and system activities with full control and monitoring features.
- Focused on scalable database design, clean Laravel architecture, and responsive UI for smooth user experience across all devices.

EDUCATION

Bachelor of Information Technology

2022 - 2026

- University of Swat, Pakistan.
- Studied programming, data structures, machine learning, databases, web development, cybersecurity, and software engineering with hands-on experience through labs and projects.

ADDITIONAL INFORMATION

- **Languages:** English, Urdu, Pashto.
- **Certifications:** Web Development Bootcamp , Node.js Backend Development Bootcamp, Git & GitHub Workflow Mastery (Quantum Tech Academy)
